

Lisa Holle is a Clinical Professor at the UConn School of Pharmacy and at the UConn School of Medicine. Her practice site is at the UConn Health Carole and Ray Neag Comprehensive Cancer Center, where she works in a team-based ambulatory care clinic. Dr. Holle completed her Bachelor of Science in Pharmacy and post-baccalaureate Doctor of Pharmacy from the University of Wisconsin–Madison. She completed a specialized oncology residency at UT M.D. Anderson Cancer Center and is a board-certified oncology pharmacist. Dr. Holle has worked as an oncology pharmacist for over 25 years in a variety of settings including private hospitals, academic medical centers, and medical communications.

Dr. Holle has been an active member of the Hematology Oncology Pharmacy Association (HOPA) since its inception. She has held positions on HOPA's Board of Directors, including Secretary and President, she is Past HOPA's President, and has volunteered on numerous committees and task forces. Dr. Holle is also a past Secretariat member and past Treasurer of the International Society of Oncology Pharmacy Practitioners (ISOPP). She is an active member in many other professional oncology and pharmacy organizations. Dr. Holle's clinical research program focuses on numeracy and patient decision-making, oncology quality improvement initiatives, medical marijuana, and oral anticancer therapy management. She thinks the importance of the patient-provider, and whether the provider is a physician, a pharmacist or an entire health care team, it doesn't matter, She thinks it's best to have a whole team involved so you get every body's input, is critical to optimizing outcomes in patients.
